

# Time to Think Ebola

Information for pharmacy staff

**A message from Professor Sir Bruce Keogh, National Medical Director and Dr Keith Ridge, Chief Pharmaceutical Officer:**

So far over 10,000 cases of Ebola have been recorded and over 50% of patients have died, making this the worst Ebola epidemic in history. Currently there is no known cure. With extensive global travel, it is important to be mindful and vigilant of Ebola when patients present to NHS services.
