

Community Pharmacy Consultations

Pharmacists and their teams spend on average
38 working days a year providing
healthcare advice for patients*

Pharmacists and their teams provide over
48 million healthcare consultations per year*

Every week pharmacists and their teams
respond to over **600,000 patient queries** about their symptoms*

Healthcare advice given by pharmacy teams
saves around **57,000 A&E and Walk-in Centre visits** every week*

Healthcare advice given by pharmacy teams
saves almost half a million **GP visits** every week*

Pharmacists are highly qualified experts in medicines. We offer appointment-free healthcare advice with no waiting lists, right in the heart of your community.

* PSNC Pharmacy Advice Audit 2020: In June and July 2020 more than 9,400 pharmacies in England recorded the informal patient consultations they gave over a 24-hour period. These consultations have no specific funding associated with them. 43% of the consultations resulted in advice only being given ie they were not associated with any OTC sales. The consultations are a critical part of pharmaceutical care, helping patients and reducing pressure on other healthcare providers.
