

# Agenda for the Community Pharmacy IT Group meeting

## to be held on Wednesday 22nd September 2021 by videoconference

### commencing at 11am and closing at 2pm

**About CP ITG:** The Group was formed in 2017 by [PSNC](#), [NPA](#), [RPS](#), [CCA](#) and [AIMp](#). The meetings are attended by members representing the five organisations and representatives from [pharmacy system suppliers](#), [NHSBSA](#), [NHS Digital](#), [NHSE&I](#), and [NHSX](#). Further information on the group can be found on the [PSNC website](#).

**Members:** Matthew Armstrong (Chair), Steve Ash, David Broome (Vice Chair), Sibby Buckle, David Evans, Nick Kaye, Sunil Kochhar, Fin McCaul, Graham Phillips, George Radford, Ravi Sharma, Craig Spurdle, Iqbal Vorajee and Heidi Wright. Darryl Dethick (PCT Healthcare Pharmacy / AIMp) is a new member.

**Secretariat:** Dan Ah-Thion.

request encouraged to:

- Join early with a webcam to test access; and use a large screen to view the slides.
- Use the 'raise hand' feature to seek the attention of the Chair.
- Use the chat box to share comments, queries and to answer each other (Note: time constraints prevent every comment being addressed in the meeting, but comments will be saved to aid the groups work).
- Mute any devices logged into the meeting whilst not speaking (using the Zoom mute button , the device's mute option, or \*6 on the phone for toggling mute/unmute).
- Make use of [PSNC's quick reference Zoom guide](#).
- Note: those attending the meeting can extend the invite to additional colleagues within their organisation so that they can dial-into the meeting at the relevant stage.
- Please use the Zoom 'rename' feature so that your display name looks like this: <First name> <Surname> (<organisation>).

The Zoom details are below.

- *Log-in:* <https://us02web.zoom.us/j/82086259375?pwd=ekdsdDJlVHBGdmtlZysZOXhWOTRvZz09>
- *Meeting ID:* 820 8625 9375 *Passcode:* 601131
- *One-tap mobile:* +441314601196,,82086259375# UK 442030512874,,82086259375#

*Dial-in for audio:* 0203 051 2874. *Alternatives:* 0131 460 1196; 0203 481 5237; and 0203 901 7895

**Social media:** To tweet about the group/meeting (excluding anything confidential) use the hashtag, *#cpitg*

**Meeting format:** The meeting will be divided into two halves, and there will be a thirty-minute break from 12:30-13:00.

- |    |   |             |
|----|---|-------------|
| 1. | <b>Welcome from Chair</b>   | 11:00-11:05 |
| 2. | <b>Apologies for absence</b><br>No apologies for absence have been received at the time of setting the agenda.                          | 11:00-11:05 |
| 3. | <b>Minutes of the last meeting</b><br>The minutes of the meeting held on 9th June 2021 were emailed to the group alongside this agenda. | 11:05-11:05 |
| 4. | <b>Actions and Matters Arising</b>  | 11:05-11:05 |

Outstanding actions have been carried forward within the workstream updates appendix.

#### Actions (session 1 of 2)

- |    |  |             |
|----|--|-------------|
| 5. | <b>Pharmacy IT systems and Five-Year framework IT:</b> Updates from NHSE&I, NHS Digital and others (page 3) ( <a href="#">Appendix CP ITG 01/06/20</a> ) | 11:05-12:15 |
| 6. | <b>Discovery work about patient digital signatures</b> by Department of Health and Social Care (page 4) ( <a href="#">Appendix CP ITG 02/06/20</a> )     | 12:15-12:30 |

#### Break

**12:30-13:00**

#### Actions (session 2 of 2)

- |    |  |             |
|----|--|-------------|
| 7. | <b>CP ITG workstreams for group comment:</b> NHSX strategy, Product name survey, IT infrastructure survey, NHS Service Finder, dm+d code changes and synchronisations (pages 5-6) ( <a href="#">Appendix CP ITG 03/06/20</a> ) | 13:00-13:30 |
| 8. | <b>EPS updates</b> (page 7) ( <a href="#">Appendix CP ITG 04/06/20</a> )   | 13:30-13:50 |

#### Report

- |     |  |             |
|-----|--|-------------|
| 9.  | <b>CP ITG workstreams for report</b> (pages 8-14) ( <a href="#">Appendix CP ITG 05/06/20</a> ) | 13:50-13:55 |
| 10. | <b>Post-meeting CP ITG communications and messages</b>   | 13:55-13:55 |
| 11. | <b>Any other business</b>  | 13:55-14:00 |

#### Upcoming pharmacy/healthcare IT events

- Listed at: [psnc.org.uk/itevents](https://psnc.org.uk/itevents) and [digitalhealth.net upcoming webinars and events](https://digitalhealth.net/upcoming-webinars-and-events).

#### Future meetings

- Wednesday 17th November 2022
- Wednesday 9th March 2022
- Wednesday 8th June 2022
- Wednesday 21st September 2022 (to be confirmed)

Subject	Pharmacy IT systems and Five-Year framework IT
Date/time of meeting	22nd September 2021: 11:10-12:15
Status	Public
Presenters	Alastair Buxton (PSNC), James Palmer (NHS Digital), Claire Hobbs and Libby Pink (both NHSE&I)
Overview	Five-Year framework IT and pharmacy IT developments are to continue.
Proposed actions	The group is to be updated and is to discuss developments.

NHS England and NHS Improvement, NHS Digital and the wider group will discuss IT developments, strategy and progress to support the Five-year Community Pharmacy Contractual Framework ([Five-Year framework](#)).

#### [CPCF update IT](#) (11.05-11.10)

- Alastair Buxton (PSNC) will provide an update.

#### [Supplier feedback](#) (11.10-11.15)

Suppliers have expressed to NHSE&I and PSNC preferences regarding welcoming:

- extra notice about changes (e.g. New Medicine Service (NMS) medicines list / service changes);
- enhanced NHS assurance processes;
- collaboratively feeding into NHS IT specs throughout their development; and
- submitting information about their company and solution once to the NHS.

A suppliers working group plans to further document such preferences and share this back to the group at the November 2021 meeting.

NHSE&I and PSNC will explore the addition of a protocol to enable suppliers to be notified four weeks ahead of major changes to the NMS medicines list. All parties are also considering how IT project planning can support the CPCF.

#### [Supplier research](#) (11.15-11.30)

- James Palmer (NHS Digital PODAC (Pharmacy, Optometry, Dentistry, Ambulance and Community Care) Programme Head) will provide an update about recent supplier research and next steps.

#### [CPCF update IT](#) (11.30-12.00)

- Claire Hobbs (NHSE&I Project Delivery Manager for Digital Pharmacy) will provide an update.

#### [COVID-19 vaccination programme IT](#) (12.00-12.15)

- Libby Pink (NHSE&I, COVID-19 vaccine programme) will provide an update on recent progress.

[\[Back to meeting overview, page 1\]](#)

Subject	Discovery work about patient digital signatures
Date/time of meeting	22nd September 2021: 12:15-12.30
Status	Public
Presenters and authors of the paper	Eloisa Whiteman and Johnathan Gill (both Medicines Directorate of Department of Health & Social Care (DHSC))
Overview	DHSC are conducting discovery work to look at the possibility to digitise patient signatures that are collected for prescriptions.
Proposed actions	The group are asked to comment on the DHSC questions listed.

The Prescribing Policy and Charges team at DHSC are conducting discovery work to look at the possibility of digitising the patient signatures that are collected for prescription charge/exemption declarations. DHSC wish to hear the views of Community Pharmacy IT Group members on the possibility of digitally capturing signatures.

DHSC are in the early stages of scoping out what might be possible, and the group's feedback will help inform the next steps.

#### CP ITG action

The group is asked to comment on:

1. What do you think would be the best way to capture digital signatures for prescriptions in community pharmacies and would this method integrate into current systems?
2. Have any pharmacy contractors or system suppliers within the group started to capture some other digital signatures already and if so what solutions are being used?
3. What do you think would be the main challenges in implementing digital signatures?
4. What benefits might there be in implementing digital signatures? E.g. benefits for pharmacies/patients, and benefits with moving to more paperless processes.

[\[Back to meeting overview, page 1\]](#)

Subject	CP ITG workstreams for group comment: NHSX strategy, Product name survey, IT infrastructure survey, NHS Service Finder, dm+d code changes and synchronisations.
Date/time of meeting	22nd September 2021: 13:00-13:10
Status	Public
Overview and proposed actions	An update will be provided on some of the group's workstreams with the opportunity to comment on these. Comments or feedback that support progress on the priority areas can also be emailed to Dan Ah-Thion ( <a href="mailto:it@psnc.org.uk">it@psnc.org.uk</a> ).

### [NHSX working to develop a new strategy](#) (13:00-13:10)

NHSX and NHS Transformation Unit discovery work is continuing to enable the creation of an NHSX digital strategy for pharmacy, optometry, dentistry, ambulance and community services (PODAC). NHSX are working closely with NHSE&I and other stakeholders to build on the opportunities already taken to accelerate transformation in these areas.

Community Pharmacy IT Group and Community Pharmacy Digital Group pharmacy representatives were encouraged to take part in past workshops (on 10th February 2021 and on 30th April 2021). PSNC and other pharmacy representatives also fed in via one-to-one interviews with the project team. Outputs have been shared with those who took part.

#### CP ITG action:

- NHSX will provide a verbal update.

### [Product name survey](#) (13:10-13:10)

Community pharmacy contractors currently have to update two different NHS profile information updaters: the NHS DoS Profile Updater and the NHS Website Profile Editor. CP ITG and PSNC have long requested that these two platforms be merged, but so far, the complexity of merging the tools and data has prevented this.

PSNC is supporting the ongoing work of NHSX, NHS Digital and NHSE&I to look for ways to merge these tools to reduce the data entry requirements for contractors. As part of this, we are surveying the CP ITG, and Community Pharmacy Digital email Group (CPDG) members about their views on the name of a future merged tool. The group will be updated at a future meeting on the topic.

[Please click here to complete a 2-minute survey about proposed names for the future tool.](#)

### [CP ITG IT infrastructure survey required extra communications](#) (13:10-13:10)

The infrastructure survey was reviewed by the group at previous meetings and via email. It was launched in time for the group's June 2021 meeting.

#### CP ITG action:

- The group are encouraged to continue to promote this survey using [Appendix CPITG 03C/06/21 IT survey communications copy \(docx file\)](#). The results will be shared with the group in due course.

## [NHS Service Finder enhancements and user research](#) (13:10-13:15)

NHS Service Finder is a free tool that provides access to information from the Directory of Services (DoS) and the NHS website. It is not accessible by the public, but it does allow pharmacy teams and other healthcare professionals to search for service information quickly. The [NHS Service Finder team published user survey results in August 2021](#).

### CP ITG action:

- NHS Digital user researchers are conducting a further round of user interviews to help further develop the NHS Service Finder tool. If you'd like to take part email [it@psnc.org.uk](mailto:it@psnc.org.uk).

## [dm+d code changes and synchronisations](#) (13.15-13.30)

- PSNC received system supplier and pharmacy contractor feedback about changes to dm+d codes impacting on the use of EPS.
- Pharmacy contractors should report any actual or potential clinical impacts using the Learn from patient safety events (LFPSE) service process outlined within the [dm+d webpage reporting guidance section](#).
- NHSBSA dm+d team are reviewing their scope to provide notifications ahead of changes and have already started to introduce some communications earlier than usual via the [Technology Reference data Update Distribution](#) communications route.
- Supplier comments have proposed that if dispensing and prescribing systems targeted aligned synchronisation dates this would reduce the risk that pharmacy contractors received problem prescriptions for items which have had changed dm+d entries. However, there are challenges given that some prescribing suppliers reportedly synchronise less often compared to pharmacy system suppliers and additionally whilst the drugs database update may be made available monthly for prescribers, it may take two to three weeks after the update for it to reach all GP practices using that system.

### CP ITG action:

Pharmacy system suppliers are asked to provide responses on the following points:

1. Some proposals have included consideration of asking suppliers whether there should be a recommended time so that prescribing and system suppliers align at a similar time e.g.:
  - first working day of the month;
  - first working day of the week;
  - first day of the month; or
  - Monday after the first Thursday of the month (for the first synchronisation of the month) to align with dm+d table availability.

System suppliers are asked to comment on this and about whether there are other preferred times to synchronise, and when they would prefer for prescribing systems to synchronise.

2. Can changes be scheduled in advance by suppliers (e.g. to be applied on the first day of the month even if this is a weekend)?
3. What period of notice should be provided ahead of changes to many dm+d codes?
4. Are there recommendations regarding the capture of prescribing system supplier feedback (aside from direct contact to companies) e.g. via organisations, events and communication bulletins that reach prescribing suppliers?

[\[Back to meeting overview, page 1\]](#)

Subject	EPS updates
Date/time of meeting	22nd September 2021: 13:30-13:50
Status	Public
Presenters	Martin Hagan and Dawn Friend
Overview	NHS Digital's and NHSBSA's EPS work has continued throughout the pandemic.
Proposed action	None.

### Report

- NHS Digital EPS and eRD utilisation rate statistics (for the June 2021 dispensing month) are set out on the right.

### NHSBSA EPS update (13:30-13:35)

- Martin Hagan will provide a short update.

### NHS Digital EPS team update (13.35-13.50)

- Jo Lambe has thanked all within the group for feeding in about EPS. Jo Lambe is moving onto a different NHS Digital role after having supported EPS since its first-of-type.
- Dawn Friend (NHS Digital EPS) will provide an EPS update.

[\[Back to meeting overview, page 1\]](#)

Subject	CP ITG work streams
Date/time of meeting	22nd September 2021: 13:50-13.55
Status	Public
Overview	This appendix provides updates on some of the other <a href="#">work plan areas</a> , much of which may not be covered in detail during this meeting given the time allotted. Comments or feedback that support progress on the priority areas, can be provided by emailing Dan Ah-Thion ( <a href="mailto:it@psnc.org.uk">it@psnc.org.uk</a> ).

1a

## Supporting the development of interoperability/integration

Relevant webpages include: [/interoperability](#) and [/dosesyntax](#)

### Shared Care Records (ShCR) update

Updates about [ShCR](#) arrangements have been included within previous meeting papers and discussed at past meetings. ShCRs were previously called 'Local health and shared care records (LHCRs)'.

LPCs and/or local contractors can continue to take steps to gain pharmacy access such as:

- identifying the ShCR project team from the [List of records systems](#);
- learning about case studies such as: [Dorset Care Record ShCR pharmacy access case study](#) and the recently published [East London Patient Record \(eLPR\) pharmacy case study](#).
- contacting the ShCR project team and other local partners to find out how to get involved;
- using the '[Planning pharmacy access briefing](#)' and [frequently updated ShCRs webpage](#); and
- reviewing the December 2020 [PSNC/RPS ShCRs/SCR letter to NHS orgs about records access](#).

CP ITG pharmacy reps and LPCs took part in the [Virtual ShCRs event \(1st July 2021\)](#). PSNC continues to work with NHSX and other relevant stakeholders on the actions decided at this meeting. More information about these actions is available here: [minutes and outputs for the Shared Care Record \(ShCR/LHCR\) summer event](#).

### Records

- NHS Digital launched a [Data Uses Register tool](#) so patients can see which organisations access [certain data](#) (also reported by [Digital Health](#)).
- NHSX is [looking at how new IT could allow pharmacy teams to add notes to patient records](#).
- NHSX [launched procurement framework for digital social care records](#).
- NHS England and NHSX [plan to invest £52 million into online maternity records](#).
- Royal Marsden Hospital [announced a partnership with Great Ormond Street Hospital to deliver a new digital health record powered by the supplier, Epic](#).
- Clinical and system leaders from Greater Manchester [presented a virtual September 2021 event about the progress with use of the ShCR 'Greater Manchester Care Record'](#).
- [Genetic test results for urgent cancer patients can now be accessed digitally across Wales](#).
- North Tees and Hartlepool Hospital [integrated into the Great North Care Record](#).
- [A case study explored how to manage healthcare data volumes in health care records](#) (e.g. more high-resolution images).

## Other updates about interoperability

- Enovacom launched a [FHIR: everything you need to know \(short factsheet\)](#) about Fast Healthcare Interoperability Resources.
- The Royal Wolverhampton NHS Trust [has extended its partnership with Babylon](#).
- NHSX Blueprinting Steering Committee said that [Blueprints are important for delivery of digital capabilities within the NHS](#). The committee considers blueprints a knowledge asset and a product of a structured approach to learning, from projects that have taken place. The committee is overseeing the development of hundreds of new blueprints.
- NHS Digital announced [the first providers had begun taking part in the national data alignment programme between the NHS and private sector](#).
- At a previous meeting, the group agreed to support the capability for anonymised data to be accessible, so that pharmacy teams' interventions can start to be auditable, and the value of community pharmacy can be better demonstrated. If PMR systems were to be adapted to allow such data sharing, it would require the development of a roadmap and a standard approach to data provision, which may benefit from use of SNOMED CT clinical terms. A PSNC-drafted dataset was prepared and a dataset for the Community Pharmacist Consultation Service (CPCS) could be added. If you would like to help progress this work, please contact [it@psnc.org.uk](mailto:it@psnc.org.uk).

1b

### Supporting NHSmail

Relevant webpage(s) include: [/NHSmail](#)

- NHSmail support pages outline the benefit of the NHSmail Teams "Virtual Visits" patient consultation platform – namely, this platform enables appointment booking and video consultation. The NHSmail team provided a demo to PSNC and CP ITG representatives. Pharmacy contractors that would like to pilot this can contact [it@psnc.org.uk](mailto:it@psnc.org.uk) with their name, ODS code and telephone number and 'Virtual Visits pilot' within the email subject title.

1c

### Supporting maintenance and demonstration of data security and information governance arrangements

Relevant webpage(s) include: [/ds](#)

## Data Security and Protection Toolkit (DSPTK)

- PSNC and NHS Digital are currently updating the Data Security and Protection Toolkit (DSPTK) and related tips. Additional user testing is also planned. If you would like to get involved with this user testing, please contact [it@psnc.org.uk](mailto:it@psnc.org.uk).
- NHS Digital may update contractors about the availability of the initial Toolkit version. However, we strongly recommend that contractors hold off accessing the Toolkit until the planned improvements have been finalised and PSNC releases its updated guidance. Contractors will still have adequate time to complete the Toolkit before the submission deadline on 30th June 2022. We will keep contractors informed of any developments.

## Other data security updates

- PSNC and NHSX published a joint [Cyber security tips IT factsheet for pharmacy teams](#).
- The implementation date of September 1st 2021 of the [GP Data for Planning and Research \(GDPR\) programme was scrapped. The proposed changes will apply only once criteria is met](#).

- World Health Organization published a report to [help national health systems protect data](#).
- The Irish government confirmed [it was aware that health data could have been stolen during a major cyber-attack and that data may potentially be abused by criminals](#). Davey Winder, cyber security expert [gave his thoughts on the Irish incident](#).
- [Moorfields Eye Hospital in Dubai was subject to an IT security incident](#).

1d

### Connectivity, business continuity arrangements and dealing with outages

Relevant webpage(s) include: [/itcontingency](#); and [/connectivity](#)

- [Microsoft announced Windows 11 plans](#).
- BT say Public Switched Telephone Network (PSTN) [phonenumber](#) will all be disconnected within four years. [Pharmacy contractors will need to ensure they connect their phones into an internet connection \(Voice Over Internet Protocol \(VOIP\)\) and consider contingencies when internet is lost](#).

2a

### Support reduced burden through tackling issues related to the practical use of pharmacy IT and promoting good IT practices

Relevant webpages include: [/itworkflow](#)

- The group previously identified going paperless as a priority – within its *Digital Priority List* and *Views on the next generation of EPS* shortlists. However, pharmacy teams continue to report considerable use of paper and printing for reasons such as enabling prescription information to move around the dispensary given limited space for PMR terminals. Following work with the group and the paperless sub-group the [‘Going paperless’](#) webpage has been further updated.
- [More than half of contractors were using MYS for end-of-month submission](#) by August 2021.
- The Government temporarily suspended the requirement for patients (or their representatives) to sign the back of NHS prescription forms or EPS tokens from 1st November 2020 until 30th August 2021. [PSNC reported on the end of this temporary suspension](#).
- PSNC published a [factsheet that explains how pharmacy team members can check if they have an older NHS Smartcard needing replacement](#).
- NHS Digital previously added the multi-site ‘FFFFF’ Smartcard code and SCR rights onto Smartcards with the pharmacist or pharmacy technician role, because of the COVID-19 pandemic. The initiative was supported by PSNC and NHS England and NHS Improvement. [NHS Digital have confirmed to PSNC that assignment codes will be further extended until 31st March 2022](#).
- Medical Futurist explored how [Drones may be used to support the delivery of health and care](#).

3a

### Supporting the development of pharmacy systems

Relevant webpages include: [/systems](#)

#### Use of pharmacy systems for CPCF services

- [DMS](#) was introduced as an Essential service in early 2021. NHSE&I and PSNC were keen for suppliers to be given information on the service, IT implications and dataset requirements. Supplier briefings occurred in October 2020, February and May 2021. Contact persons on the project introduced themselves to the group previously: Charlotte Welsh (NHSE&I) and Rob Hills and Ben Tindale (both NHSBSA). There is an objective to progress the specification work further during autumn, and for a ‘go-live date’ ideally by late 2021. PSNC is continuing to push for this

work to be completed at the earliest opportunity. Updates will be published at: [psnc.org.uk/itrequirements](https://psnc.org.uk/itrequirements) and [psnc.org.uk/dms](https://psnc.org.uk/dms).

- NHSE&I announced that a national procurement model would be in place to support community pharmacy contractors with the delivery of the Community Pharmacist Consultation Service (CPCS). This was scheduled to terminate on 1st October 2021, but was [extended](#) to the end of March 2022. Contractors are recommended to start considering which CPCS IT supplier they want to choose well in advance of the next change. From the autumn, contractors will be able to transition to their own contractual arrangements with one of the four assured IT providers: [Cegedim](#); [Positive Solutions](#); [Sonar Informatics](#); or [PharmOutcomes](#).
- NHSE&I has published a [CPCS IT Provider 'Switching' guide](#) and additional buyers guidance is expected shortly.

### 3b Supporting EPS and its enhancements

Relevant webpages include: [/eps](#), [/rtec](#) and [/itfuture](#)

#### EPS

- Since the last meeting, PSNC has restructured and revised the webpages within its [EPS website section](#). PSNC has also updated its [EPS totals reconciliation guidance \(EPS totals\) guidance and reported on EPS script volumes exceeding 95% of total items](#).
- EPS Serious Shortage Protocols (SSPs): The current 'NCSO workaround' is being phased out and it is recommended that all contractors and system suppliers ensure they are using the EPS SSP endorsement instead of NCSO as soon as possible. NHSBSA is issuing some guidance and support to system suppliers implementing the EPS SSP feature. Suppliers also have some flexibility as to the extent to which they will support pharmacy team members for example, by asking users to complete any missing or incomplete SSP endorsement information if the required endorsements are not present or not in the specified format. NHSBSA has received examples of invalid/incorrectly endorsed SSP claims submitted via EPS. [PSNC tips explain how to avoid submitting invalid SSP claims](#).

#### Real Time Exemption Checking (RTEC)

- NHSBSA has led the RTEC project since January 2020. CP ITG and PSNC have been supportive of its continued roll-out. Read more on RTEC, its phases and continued piloting of Department for Work and Pensions (DWP) RTEC at five pharmacies using PSL at: [RTEC](#). Feedback from RTEC users (PSL/EMIS/Cegedim/Titan/Lloyds/RxWeb systems) has continued to be very positive. Use of RTEC reduces the exchange of paper between pharmacy teams and patients, assisting infection control.
- [Contractors are now being encouraged to register for RTEC](#) and more than three quarters of pharmacy organisations have now done so.
- NHSBSA, DWP and the RTEC steering group plan to allow the expansion of the DWP RTEC functionality to additional pharmacy contractors shortly.
- PSNC published an [IT case study in which a Pharmacist benefitted from RTEC](#). (CP ITG Vice Chairman, David Broome).

### 4a Consider the development of apps, wearables and technologies in healthcare

Relevant webpages include: [/apps](#)

#### NHS App

- [NHS App](#) has reached [more than 10 million users and become the UK's most popular app](#) with

over 6 million new users since the COVID-19 vaccination status service was added on 17th May 2021. The NHS App is available on the Google Play store and the Apple App store.

- The NHS App team are working on [further features](#) including: **Personal Health Records (PHRs) integration with NHS App**: The first supplier, Patients Know Best, was made available in the NHS App from April 2020 and more are expected to go live in late 2021.

### Tool quality and tool frameworks

- NICE is [consulting on its plans to amend health technology evaluation](#). This plan is intended to enable quicker innovation of personalised medicine and digital health technologies.
- Digital Health explored the [clinical and regulatory factors of Mobile messaging platforms](#).
- British Medical Journal (BMJ) [analysed over 20,000 mobile health apps on the Google Play Store the majority of which did not properly explain how data was being protected](#).
- Davey Winder, data security expert explored the [design and use of health-related apps](#).

### Apps and tools

- [NHS website launched newly designed public-facing profile for pharmacies](#). The new pharmacy profiles aim to better meet the needs of patients, feature improved support for mobile devices and meet modern accessibility standards.
- ORCHA (the Organisation for the Review of Care and Health Apps) published '[Digital Health in the UK, National Attitudes and Behaviour Research](#)', after surveying those who use health apps and those who do not, to provide a snapshot of app use across UK regions and across demographics. Medtech News [reported on the related findings](#).
- Digital Health reported [on the launch of NHS Digital Weight Management Programme](#).
- NHS Test and Trace app [expected to be used into 2022, contracts suggest](#).
- [The Government launched COVID Pass Verifier app for businesses to more easily verify the vaccination status or offer proof of a negative test](#).
- [More than three million records were uploaded to the Welsh COVID-19 passport service the day it was launched](#).
- [A digital physiotherapy tool has the potential to save more than £1m annually in Wales, results from a pilot suggest](#).
- [BT reported on the digital transformation in healthcare](#), 97% of people who've communicated with the health service since the beginning of the pandemic have done so digitally. And 80% of UK health providers believe the need to deliver better remote access and care is the main driver of digital transformation.
- [Combining consumer technology and clinical needs will make health information universally accessible](#), the vice president of Google Health said.

### GP tools

- UK digital health provider Babylon [has announced plans to become a public company following a \\$4.2bn \(£2.9bn\) merger](#).
- GP at Hand [hit a new milestone of 100,000 patients on their GP practice list](#).
- [More than 120 GP practices in London and Greater Manchester have deployed a telephony solution from X-on](#).
- A GP practice in Milton Keynes [has partnered up with Livi to offer video consultations for patients which includes weekend and evening appointments](#).

## Artificial intelligence (AI) and robotics

- HeartFlow tech company [explored how gender inequalities might be tackled with help from AI](#).
- NHS Shared Business Services (SBS) [has issued a tender calling for intelligent automation \(IA\) vendors that supply “off the shelf” automation solutions](#) which would ease NHS administrative task work. The 48-month framework will allow NHS organisations to purchase IA services from pre-approved suppliers, streamlining the process of implementing IA in the health service.
- Pulse reported that [NHSX and NHS England are considering the viability of a wider roll out of an AI triage model based on that used by Babylon](#).
- NHS AI Lab’s [“AI in Health and Care Award” backed a further 38 projects](#) with £36 million of funding. These will be backed by NHSX and Accelerated Access Collaborative (AAC).
- The UK’s medicines watchdog [has vowed to improve interoperability and collaboration across the health system through smart solutions such as AI](#).
- AI has been used to predict the structures of almost every protein made by the human body. [The development could help the discovery of new medicines](#).
- [The pandemic has shifted views on AI and data use across industries including within the NHS](#).
- Robotics & Autonomous Systems (UK-RAS) published the report, [Preparing the Workforce for 2030: Skills and Education for Robotics & Autonomous Systems](#).

5a	To support useful and usable IT beyond pharmacy PMR systems and EPS
	Relevant webpages include: <a href="#">/itfuture</a>

## Inclusion
