PSNC Briefing 015/20: Serious Shortage Protocols (SSPs): SSP005 – Fluoxetine 10mg tablets

Introduction

This PSNC Briefing provides information on the Serious Shortage Protocol (SSP) for Fluoxetine 10mg tablets issued by the Secretary of State for Health and Social Care on 12 March 2020. **SSP005** will enable community pharmacists in England, Wales and Northern Ireland to supply patients with a different formulation.

For prescriptions (NHS or private) requesting:	Supply permitted under SSP005:
Fluoxetine 10mg tablets	Fluoxetine 10mg capsules

SSP005 allows for the **capsule** formulation to be supplied, if Fluoxetine 10mg tablets specified on the prescription is unobtainable. The dosage and duration of treatment would remain as prescribed.

Pharmacists are required to read and comply with the requirements outlined within the individual SSP as published on the [NHSBSA website](#). This briefing is only intended as a short guide to read in conjunction with [PSNC's SSP guide for community pharmacy teams](#).

This SSP commenced on 12 March 2020 and is currently due to expire on 13 May 2022; the expiry date may be brought forward or extended so the validity of the SSP should be checked on the NHSBSA website, as appropriate.

Key points

1. Pharmacists who receive a prescription for Fluoxetine 10mg tablets **must** consider SSP005.
2. Pharmacists should ensure they are using the latest version of an SSP before considering the supply of an alternative product.
3. The supervising pharmacist **may** supply the alternative capsule formulation – having exercised his/her professional skill and judgement – he/she is of the opinion the supply is reasonable and appropriate for the patient, and the patient agrees and consents to the alternative supply.
4. There are **additional considerations** associated with supply under an SSP, for example:
 - a. **Dosage** should remain as originally prescribed;
 - b. Under these SSPs the total **quantity** supplied should be equivalent to the duration of treatment as the original prescription;
 - c. **Labelling** should include 'supplied against SSP number [state number]';
 - d. **Claiming/endorsement** – see additional endorsement guidance below;
 - e. **Record-keeping** – the alternative supply should be recorded on the PMR/as per your usual SOP;

- f. GP notification is not required for these SSPs but may be professionally/clinically appropriate in certain cases;
- g. **Patient consent/agreement** – if a patient declines an alternative under an SSP you should advise them to return to the prescriber; and
- h. All prescriptions in England are covered under these SSPs, including hospital and private prescriptions.

Endorsements

To ensure correct payments (fees and reimbursement) for any supplies made against this SSP, the contractor must endorse the prescription form or Electronic Reimbursement Endorsement Message (EREM) as per Clause 9, Part II of the Drug Tariff. When supplying in accordance with these SSPs, contractors should refer to the updated endorsement guidance for each SSP available on [NHSBSA's SSP page](#).

Please see below the required endorsements for this SSP.

- **'SSP 005'** – to indicate that the supply was made in accordance with an SSP. For endorsement purposes, SSP005 should be endorsed as SSP 005.
- **For SSP005, other usual endorsements relating to drug, strength, formulation and quantity are not necessary as presence of just the 'SSP 005' endorsement would clearly indicate to the NHSBSA what was supplied.**

See below worked endorsement example for a supply made under SSP005:

Prescription for	Alternative supplied under SSP005	Endorsement example	
Fluoxetine 10mg tablets	Fluoxetine 10mg capsules	SSP 005	Fluoxetine 10mg tablets 30 tablets One tablet daily

SSP endorsed FP10 paper prescriptions must be placed at the front of the red separator (preferably tied with an elastic band) when submitted to the NHSBSA for processing.

See below worked endorsement example for a supply made under SSP005 on electronic prescription:

Where **'SSP' endorsement functionality is available** on the dispensing system the contractor must select SSP, select the appropriate pack in the system and input/endorse the three-digit reference number.

Prescription for	Pharmacy contractor supplies and <u>selects in system</u> pack of	Endorsement example
Fluoxetine 10mg tablets x 30	Fluoxetine 10mg capsules x 30	SSP 005

See our [PSNC Briefing 011/21: Serious Shortage Protocols \(SSPs\) updated endorsing](#) for the full endorsement guidance.

Prescription charges

For each item, only one prescription charge will be applicable for patients who are not exempt from prescription charges. The only circumstance in which patients would not have to pay for a prescription charge is where an SSP requires a lower quantity to be supplied. Please note that the SSP for Fluoxetine 10mg tablets does not allow for a lower quantity to be supplied, so patients will continue to pay prescription charges (unless they are already exempt).

Top Tips

- NHSBSA advise that contractor SSP claims should be clear and unambiguous and follow the protocol guidelines – NHSBSA processing staff must be able to determine what has been supplied.
- Ensure that the dispensed notification messages for all EPS SSP claims are submitted on time each month and before the expiry date of the SSP. View our [SSP submission reminder](#) to ensure your SSP claims are appropriately submitted to NHSBSA for reimbursement.
- Provided that supplies are made within the expiry date of the SSP005, any SSP claims will continue to be accepted for up to three calendar months after expiry or withdrawal of the SSP. For example, SSP for Fluoxetine 10mg tablets, which is due to expire on 13 May 2022, the NHSBSA would look for the “SSP” endorsement in the May batch (submitted by the 5 June), June batch (submitted by the 5 July), July batch (submitted by the 5 August).
- Where available, use the claim amend facility on your PMR system to rectify any incorrect EPS claims already submitted within a calendar month.
- Check that the correct number of patient charges are collected and declared on the end of month FP34C submission form.
- Any paper prescriptions SSP claims need to be placed in a red separator.
- Pharmacy contractors are advised to keep a record of all SSP claims submitted each month to reconcile against the Schedule of Payments.

SSP FAQs

Q. Can pharmacists supply an alternative Fluoxetine product (for e.g. oral solution) not listed in the SSP?

A. Pharmacists are not able to deviate from the SSP on what to supply to patients; they can only supply alternative as outlined in the SSP for Fluoxetine 10mg tablets. However, if pharmacists think that an alternative product not listed in the SSP would be suitable for the patient, such as Fluoxetine liquid because the patient has difficulty swallowing capsules, they should either contact the prescriber to discuss this (with the patient’s consent) or direct the patient back to their prescriber.

Q. Can I obtain and supply the unlicensed Fluoxetine 10mg tablets against the SSP?

A. No. Supply of unlicensed tablets are not covered by SSP005 for Fluoxetine 10mg tablets. The need for an unlicensed product needs to be determined by the prescriber. If the unlicensed product is required, the prescription would need to specify ‘Fluoxetine 10mg tablets (Special Order)’ and the prescription needs to be endorsed as a Non-Part VIII B special.

Q. Does the SSP apply in Scotland, Northern Ireland and Wales?

A. The SSP applies in England, Wales and Northern Ireland. It does **NOT** apply in Scotland.

Q. How can I check if I have been correctly paid for any supplies made under SSPs?

A. The total of any SSP fees paid will appear on your monthly Schedule of Payment under ‘SSP Remuneration (SSP fees)’. The ‘SSP reimbursement’ field will indicate the total VAT element only applicable to any supplies made under SSPs. Contractors are strongly advised to keep a monthly record of all supplies made against SSPs to reconcile against the Schedule of Payments.
