Digital Pharmacy Policy

Pharmacy IT priorities overview

Ursa Alad – Head of Community Pharmacy Commissioning

Gemma Ramsay – Senior Policy Lead for Digital Pharmacy

Workstreams

- Navigation
- Booking and Referrals Standard (BaRS)
- Access Record (AR)
- Update Record (UR) & GP action
- Payment & Data API, ePACT
- CP and GP workflow screens
- Digital Service for Integrated Care

Nationally we have:

1. Finalised MVP to support the launch of the service to support the seven common conditions
2. Published Tech Specifications and GPIT Roadmap items for BaRS for General Practice to Community Pharmacy, GP Connect Access Record, Update Record
3. Entered discovery phase to use BaRS for GP to CP for BP and OC referrals and to determine solution for CP to GP when there is a need to request there is a for action/ follow up required post a consultation
4. Worked with GP and CP suppliers to inform individual system supplier roadmaps
5. Planned approach to risk-based assurance and first of type roll-out
6. Published a Prior Information Notice June 2023, invited suppliers to express interest to onboard to the Digital Service for Integrated Care (DSIC) catalogue and start Market Engagement activities
7. Announced a £2.8m Roadmap Award to incentivise and support Community Pharmacy System Suppliers to accelerate DevOps
8. Completed discovery to establish the national Standards and Capabilities framework for Community Pharmacy for CPCS, BP and OC
9. Established a working group with regional and ICB colleagues to support regional and local business change and implementation

We will:

1. Establish the Digital Services for Integrated Care Catalogue (expected imminently), onboard Community Pharmacy System Suppliers and buyers guides for CPCS, BP and OC and complete discovery to develop the framework for the other CPCF services
2. Publish Data & Payment APIs specification imminently
3. Manage the DevOps and Assurance of GP and CP suppliers and complete onboarding to BaRS, GP Connect Access Record and Update Record, workflow screens and Data & Payment APIs
4. Automate the pathway between Profile Manager and DoS for the Blood Pressure Checks and the Pharmacy Contraception services and create profiles and a 111Online referral pathway for the service to support the seven common conditions
5. Create a single connected and cohesive communications plan, comms messages and artifacts, and lead national stakeholder management and engagement with a particular focus on the professions
6. Create a digital benefits realisation plan and suite of artifacts
