

Respiratory Syncytial Virus (RSV) and Pertussis Vaccination Service: Online information sources for patients

When pharmacy professionals are providing vaccinations for RSV or pertussis, there are websites that patients can be signposted to for further information on the vaccines or the diseases.

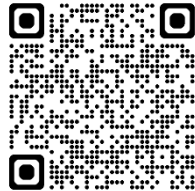

To support any vaccines provided, pharmacy professionals should signpost patients to the marketing authorisation holder's patient information leaflets (hard copies will be available within the medicine's packaging, with copies also being available from [medicines.org.uk/emc](https://www.medicines.org.uk/emc)).

Hyperlinks to the websites are listed below, alongside QR codes for each website. Patients can scan the QR code to access the website link on their mobile phones.

Information sources to obtain additional information and advice regarding RSV

Sources	
<p><u>NHS Website – Respiratory syncytial virus (RSV)</u></p> <p>Aims to give information to anyone who wants to know more about RSV and the treatment of it.</p>
