

You may be eligible for a COVID-19 vaccine if you have a weakened immune system because of a health condition or treatment

This can include if you:

- have or had blood cancer, such as leukaemia, lymphoma or myeloma
- have had an organ transplant, bone marrow transplant or stem cell transplant
- have HIV
- have a genetic disorder that affects your immune system, such as severe combined immunodeficiency (SCID)
- are having or recently had chemotherapy, biological therapy or radiotherapy
- are taking steroid medicine (depending on the dose)
- are having long-term immunosuppressive treatment for a condition such as lupus, rheumatoid arthritis, inflammatory bowel disease (IBD), scleroderma or psoriasis

This list is a summary and does not include everything. If you are unsure whether you are eligible for the vaccine, please ask us.
