

How MPs can support Neighbourhood Health

Every constituency has a network of community pharmacies supporting residents daily. MPs can help to ensure that these community pharmacies succeed and can play their full role in Neighbourhood Health by:

1. **Championing community pharmacy as a core partner** within Neighbourhood Health teams and Integrated Care Systems.
2. **Supporting sustainable, long-term investment** in community pharmacy to stabilise the sector and enable expansion of clinical services.
3. **Encouraging Parliamentary debate and scrutiny** of Neighbourhood Health implementation, including funding flows to primary care and to pharmacy.
4. **Visiting a local community pharmacy** to see the pressures, opportunities and impact of neighbourhood-level care first-hand. We can put you in touch with your Local Pharmaceutical Committee (LPC), who will be happy to arrange this.
