

Childhood Flu Vaccination Service: Online information sources for parents and carers

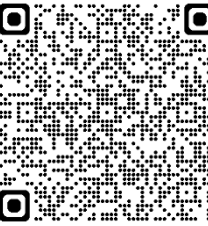

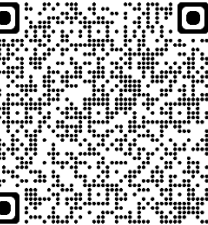

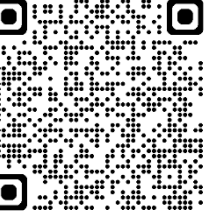

When pharmacy professionals are providing vaccinations to protect children from flu, there are websites that parents and carers can be signposted to for further information on the vaccines or on flu.

To support any vaccines provided, pharmacy professionals should signpost parents and carers to the marketing authorisation holder's patient information leaflets (hard copies will be available within the medicine's packaging, with copies also being available from [medicines.org.uk/emc](https://www.medicines.org.uk/emc)).

Hyperlinks to the websites are listed below, alongside QR codes for each website. Parents and carers can scan the QR code to access the website link on their mobile phones.

Information sources to obtain additional information and advice regarding flu

Sources	
NHS Website – Flu Aims to give information to anyone who wants to know more about flu and the treatment of it.	
NHS Website – Children's flu vaccine Aims to give practical information to anyone who wants to know more about the children's flu vaccine.
